Polomolok, South Cotabato, Philippines • Available for remote work

PROFESSIONAL SUMMARY

Lead front-end developer with 10 years of experience building web applications and full products for clients in Australia, the US, and the Philippines. My core stack is Vue 3, Nuxt 3, TypeScript, and Pinia, backed by practical experience in Laravel, MySQL, AWS, Docker, Stripe, and PWA architecture. At Appetiser I sit on the platform council and lead front-end technical direction: architecture and code review, developer skill assessment and task assignment, candidate evaluation, and onboarding. I also design UI/UX and deliver CMS-based sites for freelance clients, and I keep current by building personal projects with AI-assisted development tools. What clients and teams get from me: clear scope, maintainable code, documented handover, and direct communication.

WORK EXPERIENCE

Lead Front-End Developer • Platform Council | Appetiser Pty Ltd (Appetiser Apps)

Cremorne, Victoria, Australia (Remote) • July 2018 – Present

- Lead front-end architecture and development across client web applications using Vue 3, Nuxt 3, TypeScript, Pinia, Vue Router, Tailwind CSS, and Vee-Validate/Yup, working closely with backend developers on API design and integration.
- Serve on the platform council: assess developer skill levels, assign tasks to match capability, and contribute to platform-level decisions, development standards, and code quality across the engineering team.
- Own front-end code review, focusing on application logic, component architecture, state management, separation of concerns, framework conventions, and long-term maintainability.
- Support recruitment through technical evaluation of front-end candidates (Vue 3, Nuxt 3, TypeScript, Pinia) and act as onboarding buddy for new developers.
- **Flikit (retailer.flikit.co)**, **MyTrainingSpace**, **HireSpy**: built as installable Progressive Web Apps (service workers, runtime caching, responsive cross-browser UI) with Stripe payment integration. On Flikit, worked in an Agile team of Android, iOS, and web developers plus QA and PM, as one of two web developers.
- Contribute backend and infrastructure work as needed: Laravel with Sanctum authentication (cookies, sessions, cross-subdomain behavior), MySQL, AWS S3 storage (avatar storage, temporary URLs) and EC2, and Docker-based environments.
- Estimate and decompose features for planning, including breaking PWA capabilities into individually scoped, complexity-rated deliverables; participate in sprint planning, estimation, and retrospectives.

Freelance Web Designer & Developer | Self-employed

Philippines (Remote) • 2015 – Present

- Scope, estimate, and deliver fixed-rate website projects for small businesses, from site audit and content consolidation through design, build, and go-live.
- Translate Figma designs into responsive pages on CMS platforms (Squarespace, WordPress) and custom builds; handle domain/DNS and Cloudflare setup for launch; document every handover so clients can manage their own sites.

Full Stack Web Developer | CoDev (outsourcing) — deployed to client Lumea

Cebu City, Philippines • December 2021 – March 2023

- Front-end engineer on BxLink, Lumea's Vue 3 digital pathology application that integrates with lab devices to give pathologists customizable dashboards, streamlined daily workflows, and a faster sign-out process.
- Later joined the backend team for maintenance while continuing to maintain both the Legacy and New UIs of the application.
- Worked on CoDev's Bench Team Tracking System, an internal team and work tracking application.

Web Developer | Adaca

Sydney, New South Wales, Australia • December 2021 – 2023

- Archistar: built custom front-end components with StencilJS, VueJS, and ReactJS.
- PETstock: full-stack developer (CodeIgniter) on a large team delivering a substantial retail e-commerce project.

Web Developer / UI/UX Designer | Mynd Dynamic Team Inc. (Mynd Consulting)

Davao City, Philippines • April 2016 – 2018

- First professional role: joined as a Junior Developer and grew into front-end and UI/UX work over nearly two and a half years across multiple project teams.
- Part of the company that developed the official Dr. Oz app, published by Sharecare Inc.

SKILLS

- **Front-End (core):** Vue 2/3, Nuxt 3, TypeScript, JavaScript, Pinia, Vue Router, Tailwind CSS, Vee-Validate, Yup, ESLint, HTML, CSS, responsive design
- **Front-End (other):** ReactJS, StencilJS, AngularJS, jQuery, Bootstrap
- **Web Platform:** Progressive Web Apps, service workers, runtime caching, SSR, browser APIs, authentication (cookies, local storage, Laravel Sanctum), Firebase Cloud Messaging
- **Back-End & Databases:** PHP (Laravel, CodeIgniter), Python (Django), C# / .NET, Visual Basic, Java, C++, MySQL, Microsoft SQL Server
- **Cloud, Infra & Integrations:** AWS (S3, EC2), Docker, Cloudflare, Git, Stripe, Firebase
- **Design & UI/UX:** Figma, Photoshop, Illustrator, After Effects, InDesign, Premiere Pro
- **CMS & Platforms:** Squarespace (custom code injection, migrations), WordPress
- **Leadership & Process:** Agile/Scrum, code review, technical estimation, mentoring, candidate evaluation, onboarding, platform council participation; Jira, ClickUp
- **AI & Tooling:** AI-assisted development (Claude Code) with several personal projects built using AI, chatbot integration, Python image processing (PIL, OpenCV), technical documentation

EDUCATION

Master of Science in Computer Science | De La Salle University

2401 Taft Ave, Malate, Manila • 2017 – 2018

Bachelor of Science in Information Technology | Notre Dame of Dadiangas University

Marist Avenue, General Santos City • 2012 – 2016
